

QUALITY POLICY

Medical Supplies & Services International Ltd specialise in the manufacture and service of anaesthetic vaporisers, accessories for volatile anaesthetics and anaesthesia workstations. These devices are manufactured to meet compliance with the Medical Device Directive 93/42 EEC and amendments.

The Company's overall mission is to become first choice supplier of its customers in its chosen markets. To achieve this, the Management of MSS International Ltd are committed to operating within a Quality System which fully meets all the requirements of their existing and potential customers.

This will be through Quality Management System to ISO 13485:2003 Standard and Quality Objectives and Targets, which will focus on our ability to deliver fit-for-purpose products and materials to our customers within agreed timescales, and will additionally be subjected to continuous improvement through a set of quality, objectives, measures and mechanisms to maintain its effectiveness.

The Managing Director has the ultimate responsibility for the effective operation of our Management System and ensures that the Quality Policy is reviewed annually for continued suitability.

All Company colleagues shall share responsibility to ensure they are fully conversant with operating processes and procedures, the required quality standards and implementing continuous improvement to meet quality objectives and targets.

Our Quality Policy is publicly available.
